

## Debra Sulenski for State Committee

It's funny how you go through life thinking if you vote you are doing your part for democracy. I realized in 2016 that's not the case and I've been striving to be better ever since. So I jumped in with both feet.

In November 2016 I became an original member of Way Forward and served on their steering committee. In January 2017 I became a Committee Person in Zone One (OJR school district). If you are unfamiliar with this most northern zone, it is extremely RED. Fortunately several concerned democrats stepped up at the same time and together we turned the school board from having only one democrat to a 7-2 majority.

I am currently an active member of CCMF (Chester County Marching Forward). I am on the leadership team, and I serve on the Voter Education/Messaging, Voter Outreach and RACE (racial and cultural equity) groups.

Outside of politics, I have been involved in local theatre for over 30 years, I have been a monthly contributor to The Human Rights Campaign for 20 years, and I volunteer with BCEFA (Broadway Cares Equity Fight AIDS)

I feel that I have broad life experience, having lived in seven states and experiencing the cultural differences. My husband and I have lived in Chester County four times and have chosen to retire here.

My hope is to share information and bring the county concerns to State Committee. We must have some say in how the state party is run. Electing representatives to State Committee should only be the beginning of our involvement in party politics. I would like to see the state committee people ask for input from the residents of our county. I hope to do just that as your representative.
